DETAILED ACTION

Election/Restrictions

Applicant's election and argument with traverse of Claims 1, 2, 7 and 9 in the reply filed on July 19th 2004 is acknowledged and persuasive. Accordingly, Figures 4 and 10 belong to Species 1.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohsawa et al. (6,379,176).

Ohsawa et al. discloses a conductor (Figure 7) comprising a main portion (21), a resilient arm (23) and a conduction part (22), wherein both of the resilient arm and the conduction part are extended from one end of the main portion, the resilient arm being further bent in opposite direction to extend for a certain length and then bent for a certain angle, a contact (24) being provided on the resilient arm

at a level higher than that of the top of the main portion (re claim 1). Ohsawa et al. also discloses the resilient arm being bent in opposite direction to extend for a certain length and further bent for a certain angle facing the main portion (re claims 2 and 9), and multiple insulators containing multiple conductors (re claim 7).

Cited Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fogg, and Wu disclose conductors having resilient arm.
